Houston Creative Firm Announces Recipients of \$25,000 in Non-Profit Marketing Services Grants

Houston, TX (August 17, 2022) Dylan Moore Marketing Design (DMMD) has announced the recipients of \$25,000 in pro-bono services, awarded to 2 Houston-area non-profit organizations, as part of the company's 25th anniversary celebration.

In June of this year, DMMD announced that the firm would open applications for the grant to all Houston-area non-profit organizations that meet certain basic requirements, with additional consideration given to organizations that support youth and those that incorporate creative components such as art and music. All applications were reviewed by a jury, who then made their recommendations to DMMD.

Today the firm is announcing that the award will be split between 2 local non-profit organizations. Based on the jury's recommendations, two-thirds of the grant (\$17,000 in services) will be awarded to Girls Inc. of Greater Houston, and one-third (\$8,500 in services) will be awarded to Music Knows No Boundaries.

"We were very pleased to receive applications from so many worthy organizations, doing tremendous work and serving important causes in our community." said Moore. "The judges made it clear that the decisions were difficult, but in the end they felt that these two organizations best met our guidelines and could receive the most benefit from our services."

Girls Inc. of Greater Houston has a mission to build safe spaces and foster long-term mentoring relationships to help girls, particularly those in under served communities, develop their strengths, learn lasting skills, and take charge of their futures. **Learn more about their mission and services at [GirlsInc-Houston.org](https://www.girlsinc-houston.org).**

Music Knows No Boundaries is an annual live music event which raises funds to benefit Texas families facing the challenges of Autism Spectrum Disorder. **Learn more about the event and their mission at [MKNB.org](https://www.mknb.org).**

"We've already had initial introduction and discovery meetings with both organizations, and are working on strategies to employ our services to the greatest benefit of both amazing causes." Moore stated. "We are excited to get to work!"
